

EQUIPMENT FOR LAST CHANCE SHAFT

Operations in Mogollon District Will Be On Extensive Scale.

El Paso, Texas, August 13.—The Eberlin Mining company operating the famous Last Chance mine at Cokey, in the Mogollon mountains, has placed with a local house a large order for new equipment. It is the intention of the company to greatly improve their power plant and Theodore Carter, the consulting engineer of the company, has been spending a few days in the city ordering the machinery.

M. Carter is one of the leading mining men of New Mexico and to him is largely attributed the development of the Mogollon mountains. The Eberlin Mining company, which is the largest of the district, has been operating for some time. The company is now operating on a large scale, and is expected to produce a large amount of ore.

MORE PISTOL SALES IN EL PASO

El Paso, Tex., August 13.—Both the Shelton-Payne Firearms company and the Krakauer, Zork & Moye firm, together with the other firms in the city who sold pistols, have discontinued the sale of the pocket guns and El Pasoans who want the weapons will have to buy them from mail order houses or individuals. The new anti-pistol law went into effect Saturday. "We sold our last pistol Friday," said Mr. Shelton this morning. Other firms said the same. The pistol law requires that a tax of 50 per cent of the gross receipts from pistol sales be paid. This would compel the merchants to double the price of the guns and they discontinued the sale altogether as a result.

LODGE OF FORESTERS ORGANIZED HERE

Albuquerque Lodge is No. 19—Otto Kleinwort is Elected Chief Deputy Ranger.

Through the solicitations of J. I. McLaughlin, chief ranger of the United Order of Foresters, who has been in the city for the past week or ten days, there has been organized Albuquerque Council No. 19.

This is the first lodge of this order to be organized in the territory, as work has just been commenced. Last week fifty were taken into the order as charter members, among whom are some of Albuquerque's influential citizens.

The initial meeting of Council No. 19 was held Saturday evening in the lodge room of the Elks' opera house building, at which officers were elected and nineteen members were initiated.

The officers elected are as follows: Chief Ranger—Dr. S. L. Burton. Deputy Grand Ranger—Otto H. Kleinwort.

Vice Ranger—Mrs. Belle Lee. Chaplain—Mrs. J. C. Williamson. Treasurer—Dr. S. T. Vann. Secretary—L. Mockridge.

Escort—J. C. Williamson. Assistant Escort—Miss Rita Rowland.

Inside Guard—Jacob Riha. Examining Physicians—Dr. F. J. Patchin, Dr. S. L. Burton and Dr. N. E. Wilson.

Mr. Otto Kleinwort will have charge of the territorial grand lodge. Twenty-eight applications were obtained yesterday, and it is anticipated that inside of thirty days the lodge will have increased in membership to the number of one hundred and fifty.

The order is a social as well as a fraternal insurance lodge. It admits ladies and gentlemen on the same basis.

The ladies of the order bid fair to make the social feature an important factor, and the lodge here promises to be one that will come to the front rapidly.

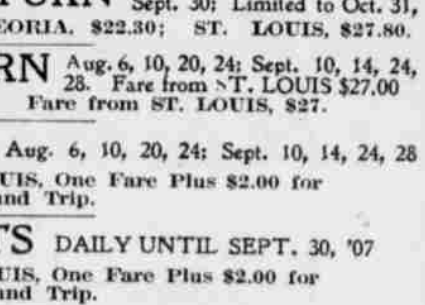

The next meeting is to be held Friday evening, August 16th. Thereafter, however, regular meetings will be held on Thursday evenings.

TO INVESTIGATE FORESTS FOR MINERAL

U. S. Geological Survey Will Aid in Discovering Wealth of Resources.

Washington, D. C., August 13.—In connection with its other work in the western states, the United States Geological Survey has undertaken the investigation of geologic condition of the national forests. It has been the constant aim of the officers of the forest service to find the fullest possible development of mining within the areas included in the national forests. Many fraudulent entries have, however, been discovered which cover non-mineral lands or deposits that by no possibility could be developed into paying mines, and it is clearly to the benefit of legitimate mining enterprises that the "wild cat" mining companies be prevented from obtaining title to the land claimed.

General Investigation. With these aims in view the geologists of the survey are to investigate the lands of the national forests. They will make a general reconnaissance of the geologic condition of the survey and under the personal supervision of the geologist in charge of the investigation will make a detailed study of the geologic condition of the survey. The geologists will make a detailed study of the geologic condition of the survey. The geologists will make a detailed study of the geologic condition of the survey.

Rheumatism

I have found a tried and tested cure for Rheumatism! Not a remedy that will straighten the distorted limbs of chronic cripples, nor tug bony growths back to flesh again. That is impossible, but I can now surely kill the pains and gangs of this deplorable disease.

In Germany with a Chemist in the City of Darmstadt I found the last ingredient with which Dr. Shoop's Rheumatic Remedy was made a perfect, dependable prescription. Without that last ingredient I successfully treated many, many cases of Rheumatism; but now, at last, I uniformly cure all curable cases of this heretofore most dreaded disease. These same like granular wastes, found in Rheumatic blood, seem to dissolve and pass away under the action of this remedy as freely as does sugar when added to pure water. And when, disclosed, these poisonous wastes of Rheumatism are gone forever, and the cause of Rheumatism is gone forever. There is now no real need of actual excuse to suffer longer without help. We sell, and in confidence recommend
